1. Project Overview

The objective of this project is to architect and develop a robust, end-to-end platform connecting truck fleet owners with qualified professional drivers. The solution will encompass dual Android applications (for drivers and owners), a comprehensive administrative control panel, and an informational promotional website.

2. Scope of Work

A. Driver Application (Android)

A dedicated Android interface empowering drivers to find suitable work engagements.

- **Profile Management:** Drivers can register, complete identity verification, and construct a professional profile detailing their license types, experience, and personal information.
- **Job Discovery:** A dynamic feed displaying available driving tasks posted by fleet owners.
- **Smart Filtering:** Granular search functionality allowing drivers to specifically seek engagements on a **monthly salary basis** or a **per-trip basis**.
- **Application Processing:** One-tap functionality to apply for listed jobs and monitor hiring status.

B. Fleet Owner Application (Android)

A specialized Android app designed for transport business owners to manage recruitment.

- **Owner Profile:** Creation and management of the trucking company/fleet profile.
- **Requirement Posting:** Tools to publish detailed job vacancies, including route specifics, vehicle types, and required driver credentials.
- **Compensation Modules:** Features to explicitly define payment terms—whether offering a fixed monthly salary or per-trip wages.
- **CandidateSelection:** An interface to review incoming applications, inspect driver profiles, and finalize recruitment.

C. Administrative Control Panel (Web)

A centralized, secure web dashboard for platform administrators.

- **User Management:** Oversight of all registered drivers and fleet owners, including account approvals, suspensions, and dispute resolution.
- **Content Moderation:** Monitoring of active job postings to ensure compliance with platform standards.

D. Promotional Website

A responsive, modern web presence serving as the primary acquisition channel.

- **Landing Page:** Professional showcase of platform features, value propositions, and direct download links to the Google Play Store.
